

Management systems that work

Helping businesses grow

Australia's leading management system implementation consultants

Safety In Industry (Sii) is the leading management system consultancy to industry. Effectively integrating Safety, Quality, Environment, FSC and prequalification systems into organisations.

Sii's core business is helping organisations streamline productivity and GROWTH through superior process and workflow systems.

Our clients range from small business to multinational organisations across industries such as construction, civil, gas, industrial and transport.

How we help you SUCCEED

Having staff who have a history of real world executive positions, our clients have taken advantage of our broad services on offer.

We are industry people who implement systems. So we know what works, and more importantly what doesn't work.

Integrating CORE OPERATIONAL requirements to position your business to gain more work.

Why Choose Safety In Industry ?

Industry experts. Our 35+ years in industry and in senior management positions enable us to specifically understand & recognise the needs of business. Spanning construction, civil, IT, transport, gas, mining, and HR, we know your industry.

Consultative approach. Our processes provide better understanding and visibility into your real needs, but more importantly, **we develop your systems with planned growth in mind.**

Proven results. Since establishment, our implemented systems have past all certification audits, prequalification requirements and industry reviews.

Partnering with key personnel to ensure effective and complying systems.

Superior Value.

Sii doesn't just implement systems, we analyse the interaction of your operational processes to ensure a seamless and integrated process across all business activities. We also identify key strategies that will enhance your opportunity to obtain more work such as professional bid and tender writing, cost effective marketing strategies and other growth initiatives.

Ongoing support. Training, coaching & constant contact ensure your systems are embedded and appropriately maintained.
