

Safety documentation that works

Ensuring safety compliance

Australia's leading safety management system consultants

Safety In Industry (Sii) is the leading safety management system consultancy to industry. Effectively developing compliant SWMS and safety documentation to meet Tier1, CM3, PICS, BROWZ and FSC prequalification requirements.

Sii's core business is helping organisations meet safety compliance requirements through effective and streamlined safety documentation.

Our clients range from small business to multinational organisations across industries such as construction, civil, gas, industrial and transport.

How we help you SUCCEED

Having staff who have a history of real world executive positions, our clients have taken advantage of our broad capabilities.

We are industry people who know safety systems. So **we know what works**, and more importantly what doesn't work.

Integrating CORE OPERATIONAL requirements to meet safety compliance.

Why Choose Safety In Industry ?

Industry experts. Our 35+ years in industry and in senior management positions enable us to specifically understand & recognise the needs of business. Spanning construction, civil, IT, transport, gas, mining, and HR, we know your industry.

Consultative approach. Our processes provide better understanding and visibility into your real needs, but more importantly, **we develop your system and safety documentation with planned growth in mind.**

Proven results. Since establishment, our implemented systems have past all certification audits, prequalification requirements, Tier 1 scrutiny & industry reviews.

Partnering with key personnel to ensure effective and relevant documentation.

Superior Value.

Sii doesn't just develop safety documentation and implement safety systems, we analyse the interaction of your operational processes to ensure a seamless and integrated process across all business activities. We also identify key strategies that will enhance your opportunity to obtain more work such as professional bid and tender writing, cost effective marketing strategies and other growth initiatives.

Ongoing support. Training, coaching & constant contact ensure your documentation is embedded and appropriately maintained.
